👤 Profile

Data Science (Data Analyst) graduate with a strong foundation in designing and creating relational databases, data analysis, and business intelligence. Skilled in SQL, Python, and the Microsoft Power Platform. Proven experience serving as an end-user focal point for the implementation and ongoing maintenance of data tracking systems (like Power Apps), turning complex data into actionable insights to support operational integrity and decision-making.

📁 EXPERIENCE

Data Analyst	2026
Carrier HVAC	In-peson
- Engineered a 5S Audit Database and an employee tracking application using the Microsoft Power Platform (Power Apps, Power Automate, Power BI) to streamline internal workflows and compliance. - Automated business operations and supported quality assurance by collaborating with cross-functional teams to implement effective digital solutions. - Executed data validation and enhanced internal reporting initiatives to drive continuous operational improvement	

📁 Projects

SkinSense – AI Skin Condition Classification System (FYP)	Jun 2026 – 02/2026
- Designed and managed the project database to store predictions, images, and user history. - Created a structured database schema to ensure data consistency and scalability.	
Sales & Product Performance Dashboard	
- Built a Power BI report with KPIs, YoY analysis, and product performance insights. - Analyzed sales trends and category performance using DAX.	
Product Warranty Analysis Dashboard	
- Designed and developed an interactive Power BI dashboard to track historical warranty claims, identify product defect patterns, and monitor claim resolutions. - Authored custom DAX measures to calculate key performance metrics such as claim frequency rates, average cost per claim, and month-over-month trends, enabling data-driven quality control decisions.	

🧠 Skills

Technical & Computer Skills

- Microsoft Office (Word, Excel, PowerPoint)
- Power Platform (Power Apps, Power Automate, Power BI, DataVerse)
- Data handling, reporting, and documentation Power BI
- SQL and Python (basic academic use)
- ETL Processes

🎓 Education

Bachelor of Computer Science (Honours) – Data Science

- School of Computing & Informatics, Albukhary International University (AIU), Malaysia
- Graduation:** Jun 2026 | **CGPA:** 3.25
 - Key Coursework:** Artificial Intelligence, Machine Learning (ML), Database Management Systems (DBMS), Natural Language Processing (NLP), Data Visualization, Statistical Programming.

📜 Certificates

Data Analysis & Visualization Certificates: Extract, Transform and Load Data in Power BI.	Microsoft Certified: Fabric Data Engineer Associate (Issued May 2026)	Microsoft Power BI Data Analyst (Microsoft/Coursera)
Data Analysis with Python	Technical Support Fundamentals
